PROJECT PURPOSE:

- Provided Construction Inspection Services for the Pavement Preservation of Veterans Memorial Tollway (I-355)
 - Conducted Quality Assurance and Quality Control on Materials Including HMA
 - Developed and Assessed Project and Inspection Documentation and Schedules
-

DAMA Consultants Inc worked as a Prime Consultant for the Illinois Tollway Authority providing Construction inspection services for the Veterans Memorial Tollway.

The work under this Contract consisted of:

- Layout Survey for existing damage caused by a trailer truck crashing into the concrete barrier wall on I-80 traveling EB while attempting to merge onto the I-355 NB ramp, for construction repair inspection.
- Safety quality control for maintenance of traffic and all other ancillary Safety work. Including, Contractor work crew field activities for quality control.

Roadway sweeping and ramp plaza guardrail modifications.

- Bridge work that includes joint reconstruction, deck repair, joint seal replacement, deck sealing, cleaning and sealing substructure and superstructure elements, and culvert rehabilitation with fiber composite system strengthening.
- Dynamic Message Sign (DMS) and Roadway Weather information System (RWIS) replacements.
- Pavement repairs, including mainline concrete patching, microsurfacing of shoulders and crack sealing.
