

IDOT PHASE II INTERSTATE ENGINEERING I-57 RESURFACING REGION 1 / DISTRICT 1

CLIENT:
Graef USA, Inc.

CONTACT:
Peter Johnson
(773)399-5443

CONTRACT:
Illinois Department of Transportation
PTB 195/ Item 10/ Work Order 7

PROJECT PURPOSE:

- Prepare Contract Plans for Construction Bid Packages for Drainage Improvements at three locations, Bridge Sealing, and a 4in Standard Overlay
- Develop Roadway Plans and Coordinate Submittals
- Develop Maintenance of Traffic Sections and Suggested Sequence of Operations
- Develop Estimate Summary and Schedules of Quantities

DAMA worked with Graef on IDOT task orders along 8 route miles I-57 in both directions between the Tri-State Tollway/I-294 and IL-1. Work Order 7 included a 4in Standard Overlay, drainage improvements at three locations, and bridge sealing as well as associated Maintenance of Traffic (MOT) sections, a suggested sequence of operations, submittal coordination, Summary of Quantities, and Schedules of Quantities.

The Phase II work also included sections and limits for proposed bus-on-shoulder improvements and typical pavement sections, a field patch survey, and identification of proposed patch locations. Drainage improvements addressed sink holes, deficient drainage structures, and the addition of inlets and catch basins.
